# Don't Be Bored... Cardboard!

It is important that we do not stop teaching our children during these stressful times. With a little imagination and engineering you will be exercising the

mind while having fun as a family. So consider your next family project is to build something creative with your family with old cardboard boxes! Remember we encourage everyone to follow our local health department protocol. Share photos like always! #ithacaymca #flattenthecurve #family #communitystrong #creativity #cardboardbox #imagination
